Description Catha edulis is a flowering plant native to the Horn of Africa and the Arabian Peninsula. Among communities from these areas, khat chewing has a history as a social custom dating back thousands of years.

Common name: Abessinischer Tee, Abyssinian Tea, Arabian Tea, Bushman s Tea

Color: White

Bloom time: June to August

Height: 4.00 to 5.00 feet

Difficulty level: easy to grow

Planting & Care

plant care may require a bit of effort, but the results are well worth the work. Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance. Common is a vine and has larger glossy green leaves than Royal. Both can survive in temperate climates if they are planted in a sheltered area.

Sunlight: Full sun to part shade

Soil: well-drained soil

Water: Medium

Temperature: 41°- 95°F

Fertilizer: Apply any organic fertilizer

Care:

- Plants love water—but don't drown them.
- That is, they don't like to sit in water, and they'll die if the soil is too wet in winter.
- The ideal soil is rich and loose, with good drainage.
- One of the worst mistakes you can make is to not provide adequate drainage.

Special Feature:

South of USDA Zone 9, this plant is usually grown in containers that are overwintered indoors.

Use

Ornamental use:

- The plant is used for ornamental purpose.

Note:

No serious insect or disease problems. Aphids or spider mites may occur. Watch for leaf spot and root rot.
