Planting and care

Plant peacock orchid bulbs in spring. Space the small bulbs, which are technically corms, 3 to 6 inches apart in moist, well-draining soil and 3 to 5 inches deep.

Growing peacock orchids prefer full sun and like the hot afternoon sun, particularly in colder zones. Plant peacock orchid bulbs in masses for a dramatic show in the summer landscape.

Sunlight: Sun growing, Semi shade

Soil: well-drained soil

Water: Water: Normal, Can tolerate less, Can tolerate more

Temperature: 10Â°C

Fertilizer: Application of manure and fertilizer at the beginning of summer and monsoon will make the plants lush and bloom even more.
