Description Dianella tasmanica, commonly known as the Tasman Flax-lily or Tasmanian Flax-lily is a herbaceous strappy perennial herb of the family Asphodelaceae, subfamily Hemerocallidoideae, found in southeastern Australia and Tasmania.

Common name: Tasman Flax Lily, Flax Lily and Blue Berry Flax Lily.

Color: yellow-orange

Bloom time: May to July

Height: 1.00 to 2.00 feet

Difficulty level: easy to grow

Planting & Care

Also, select a site that gets full sun. For dependable blooms, plants need six to eight hours of direct sunlight a day. If it's too shady, the stems will attempt to lean towards the sun or get spindly and fall over. Most of the popular varieties prefer acidic to neutral soil, but some are lime-tolerant or prefer alkaline soils.

Sunlight: Full sun

Soil: well-drained soil

Water: Dry to medium

Temperature: 10Â° to 20Â°F

Fertilizer: Apply any organic fertilizer

Care:

- Plants love water but don't drown them.
- That is, they don't like to sit in water, and they'll die if the soil is too wet in winter.
- The ideal soil is rich and loose, with good drainage.
- One of the worst mistakes you can make is to not provide adequate drainage.
- Use mulch.
-

Special Feature:

Rock gardens. Native plant gardens or naturalized areas.

Use

Ornamental use:

- The plant is used for ornamental purpose.

Note:

No serious insect or disease problems.
