Description

Megakepasma is a monotypic genus of plants containing the single species Megakepasma erythrochlamys, known by the common name Brazilian red-cloak.

Common name: Brazilian red cloak

Color: White

Bloom time: Seasonal bloomer

Height: 6.00 to 8.00 feet

Difficulty level: easy to grow

Planting & Care

Enrich the soil with leaf mold or well-rotted organic matter to encourage good drainage. Dig a hole 2 to 3 times as deep as the bulbs are high and set the bulb in the hole pointy side up. Fill the hole with soil and tamp gently. Space bulbs at a distance equal to 3 times the bulb's diameter. For a good effect, plant plants in groups of 3 to 5 bulbs.

Sunlight: Full sun to part shade

Soil: well-drained soil

Water: Medium

Temperature: 32° F

Fertilizer: apply any organic fertilizer

Care:

- Plants love water but don't drown them.
- That is, they don't like to sit in water, and they'll die if the soil is too wet in winter.
- The ideal soil is rich and loose, with good drainage.
- One of the worst mistakes you can make is to not provide adequate drainage.
- Use mulch.
-

Special Feature:

Containers. Houseplant. May be difficult to locate in commerce. Where winter hardy, it is often grown as a screen or hedge. Use

Ornamental use:

- The plant is used for ornamental purpose.
-

Note:

No serious insect or disease problems. Susceptible to mealybugs and scale.
