Schaueria flavicomma Plant

Description for Schaueria flavicomma

Plant height: 3 - 6 inches

Plant spread:

Easily grown in average, medium moisture, well-drained soils in full sun to part shade. Best in part shade. Prefers moist, fertile soils.

Common name(s): Golden Plume

Flower colours: -

Bloom time: -

Max reachable height: 2.00 to 3.00 feet

Difficulty to grow: easy to grow

Planting and care

Have a hose or bucket of water and all your planting tools nearby. Keep your bare-root rose in water until you are ready to place it in the ground. Plants can be cut back and moved in either spring or fall, but not in midsummer, as they might suffer and die in the heat.

Sunlight: Full sun to part shade

Soil: well-drained soil

Water: Medium

Temperature: 30 to 40 degrees C

Fertilizer: Apply any organic fertilizer

Caring for Schaueria flavicomma

Diligently water your plants. Soak the entire root zone at least twice a week in dry summer weather. Avoid frequent shallow sprinklings, which won't reach the deeper roots and may encourage fungus. Plants do best with 90 inches of rain per year, so unless you live in a rain forest, water regularly.

Typical uses of Schaueria flavicomma

Special features: Species and large growing cultivars for lawn specimen, shrub borders and screen. Dwarf cultivars for rock gardens, foundation plantings or specimen.

Ornamental use: The plant is used for ornamental purpose.
