Description Water deeply and regularly (mornings are best). Avoid overhead watering. Good air circulation promotes vigorous and healthy growth and helps control foliar diseases. Summer mulch helps retain moisture, keeps roots cool and discourages weeds.

Common name: Climbing plant,surrounding vegetation

Color: Yellow

Bloom time: May to frost

Height: 6.00 to 10.00 feet

Difficulty level: easy to grow

Planting & Care

Plant where they will receive a minimum of 5 to 6 hours of full sun per day. Plants grown in weak sun may not die at once, but they weaken gradually. Give them plenty of organic matter when planting and don't crowd them.Wear sturdy gloves to protect your hands from prickly thorns.

Sunlight: Full sun

Soil: well-drained soil

Water: Medium

Temprature: 27 to 28°C

Fertilizer: Apply any organic fertilizer

Care:

- plant care is not difficult but does require vigilance.
- The vines need to be trained early when they are young.
- You may use plant ties or just weave them through trellis sections.
- Fertilize the plant in spring just before new growth appears.
- Pinch off the tips of the vines in the second year to promote branching which will fill the trellis with bushy growth.
-

Special Feature:

This climbing rose can be trained to grow on walls, trellises, arbors, fences, arches, pillars, posts or other structures.

Use

Ornamental use:

- The plant is used for ornamental purpose.

Note:

Roses are susceptible to a large number of diseases, the most common of which are black spot, powdery mildew and rust. CAREFREE SUNSHINE is particularly noted for having excellent resistance to black spot.
