01

4 inch Grower Round Plastic Pot (Black)

Description for Loropetalum, Chinese Fringe Bush

Plant height: 1.0 - 1.7 inches

Plant spread:

Loropetalum chinense is commonly known as the Chinese fringe flower. Loropetalum chinense are evergreen with branches forming horizontal layers. The leaves are alternately arranged, ovate up to 5 cm long by 3.5 cm wide, and have a slightly abrasive feel.

The leaves are oval and glossy green, set on stems with crinkly brown bark. Blooms appear in March to June and last for up to two weeks on the stems. A pink-flowering variety with leaves varying from bronze-red when new to olive-green or burgundy when mature, depending on selection and growing conditions.

Common name(s): China Pink, Indian Pink, Red Chinese Fringe Flower, Rainbow Pink

Flower colours: Dark pink

Bloom time: March to June

Max reachable height: 10 to 20 feet

Difficulty to grow: Easy to grow

Planting and care

Loropetalum plants are native to Japan, China and the Himalayas. The plants may be as tall as 10 feet but are usually small trees of 5 feet. Easily grown in average, medium moisture, well-drained soil in full sun to part shade. Best flowering occurs in full sun. L. chinense grows best in fertile, slightly acidic soil in full sun for deepest foliage color.

Sunlight: Full sun to part shade

Soil: Well-drained soil

Water: Medium

Temperature: 15 to 23 degrees C

Fertilizer: Apply any organic fertilizer

Caring for Loropetalum

- The plants may be pruned to keep them in a smaller size.
- Pruning is done in early spring and a light application of slow-release fertilizer right around the same time will enhance the health of plants.
- Site in partial shade in fertile, humusy, moist but well-drained soil.

Harvesting

NA

Typical uses of Loropetalum

Special features: Foliage and flowers

Culinary use: NA

Ornamental use: The plant is used for an ornamental purpose. Can be used for foundations hedges or screens, borders, woodland gardens.

Medicinal use: NA
