Description Chikrasi is a deciduous, medium-sized, sometimes fairly large tree up to 30 (max. 40) m tall. Chikrasi is a valuable multipurpose tree genus, distributed mainly in South and Southeast Asia. The timber is highly prized for high-grade cabinet work, decorative panelling, furniture, musical instruments, interior joinery such as doors, windows and light flooring, sporting goods and for carving.

**Common name:** bastard

**Color:** white

**Bloom time:** winter

**Height:** 10 m

**Difficulty level:** easy to grow

**Planting & Care**

The timber is highly prized for high-grade cabinet work, decorative panelling, furniture, musical instruments, interior joinery such as doors, windows and light flooring, sporting goods and for carving.

**Sunlight:** Full Sun

**Soil:** well-drained soil

**Water:** Medium

**Temperature:** 14–27°C.

**Fertilizer:** Apply any organic fertilizer

**Care:**

- Growing plants can be inexpensive, particularly when growing them from seed.
- Seeds of plants flowers should usually be sown directly into the sunny flower bed, as developing roots do not like to be disturbed.
- 

**Care:**

- The deep planting encourages the developing stem to send out roots to help stabilize the plant and perhaps eliminate the need for staking.
- Also, deep planting keeps lily bulbs cool when temperatures soar.
- 

**Special Feature:**

The leaves are used to season meat and other foods in Caribbean, Latin American and Asian cuisines. It is often added to chutneys, a sauce containing fruits or vegetables that is eaten with other dishes.
