Description

Description for Crinum procerum var

This is a stemmed tropical Crinum with burgundy leaves. The flowers are a plus, but it s the foliage that makes this plant such an attraction. Crinum procerum var. splendens is a large bulb. It has somewhat rigid strap-leaved foliage. The foliage is the color of rich burgundy. This strap-leaved foliage grows 3 to 4 feet tall and arches as wide. In autumn and intermittently throughout the year, a thick stem will rise holding a plump bud filled with a cluster of narrow, trumpet-like furls of flowers that open into a delicate array of white petals blushed in diaphanous wine color.

Common name	Flower colours	Bloom time	Height	Difficulty
Grand Crinum Lily or Spider Lily.	Pink & White	Fall.	3-4 feet.	Easy.

Planting and care

Remove the plant carefully from its pot by laying it on its side and lightly tapping the sides of the container. Gently slide the plant out of the pot.

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun.	Rich, well-drained soil.	Requires consistently moist soil; do not let dry out between waterings.	Hardy to 20 F but with some foliage damage - evergreen to around 27 F.	During the plants growing season a apply a balanced fertilizer diluted to 1by4.

Caring for Crinum procerum var
