Description

Description for Crocus (Red)

Crocus plants are a bulbous, perennial with globular corms, having 15 to 20 cm plant height.

Common name(s): Crocus

Flower colours: Red

Bloom time: Spring, Winter

Max reachable height: Up to 15 inch

Difficulty to grow:: Easy to grow

Planting and care

Sowing season of crocus bulb is in the rainy season. Before sowing, you can keep the bulb in the refrigerator in a ventilated mesh bag for 10 to 14 weeks. The highest chilling temperature is around 4 C. Corms should be planted at 10 to 12 cm deep; maintaining 10 to 12 cm spacing between two bulbs. This bulb requires loose and porous potting soil.

Use the potting mix for bulb plantation as

Garden soil + Compost + Perlite + Sand (2:2:1:1)

Soil + Cocopeat + vermicompost (2:1:2)

Sunlight: Full sun to part shade

Soil: well-drained soil

Water: Medium

Temperature: 20 to 30 degrees C

Fertilizer: Apply any organic fertilizer

Caring for Crocus

- Water a plant when the soil feels dry to touch. Water thoroughly in the summer and reduce watering for the winter & rainy season.
- Try to water the plants in the morning around 8-10am.
- You should remove dead, infected or damaged plant parts and throw in the garbage collector.
- You should fertilize a plant mostly in the spring season, flower bud stage.
- Mulch the potting mix with organic material.

Typical uses of Crocus

Special features: Attractive flowers

Ornamental use: The crocus plant is used for an ornamental purpose. Plant in groups for a spectacular show in the garden.
