Dahlia has many varieties available now, consists of the major groups, namely; pompon dahlia small and medium cactus dahlia small and medium decorative dahlia and large decorative dahlia. Dahlia flower comes in different color and shapes. The size of the flowers varies from 2 inches to 10 inches in diameter. The petals also vary from single to honeycomb type.

Dahlias make excellent cut flowers, which will typically last about a week in the house.

Common name(s): Dahlia

Flower colours: Any color

Bloom time: Mid-summer to autumn

Max reachable height: Up to 1 m

Difficulty to grow: Easy to grow

Planting and care

Dahlias should be planted in the spring season for most areas. Dahlias need a sunny location to thrive. An area that receives at least 8 hours of direct sunlight is best. Less sun equals taller plants and fewer blooms. Exception for hot climates, they will need morning sunlight, afternoon shade.

Sunlight: Full sun

Soil: Sandy loam soil

Water: Moderately

Temperature: 20 to 30 degree C

Fertilizer: Apply any organic fertilizer.

Caring for Dahlia

- Watering should be done early in the morning if the soil feels dry to touch.
- Pinch out the growing point to encourage to the flowers bud.
- Pinch the center shoot just above the third set of leaves.
- For the taller dahlias, insert stakes at planting time.
- Moderately pinch, dis-branch, and dis-bud, and deadhead to produce a showy display for 3 months or more.
- Mulch with the plastic mulch or organic mulch.
