Description

Description for Dinner Plate Aralia

Shield Aralia are treelets or small trees, 2 to 6 m tall. Leaves 1 or 2 pinnate; leaf stalk 35 to 30 cm, enlarged and clasping at base, alate for 1 to 6 cm with membranous wings. Leaflets are broadly elliptic to oblate or kidney-shaped, occasionally ovate or obovate, papery to subleathery, base shallowly heart-shaped or convex, margin subentire to serrates. Tiny flowers occur in erect panicles of umbels.

Common name	Flower colours	Bloom time	Height	Difficulty
Shield Aralia, Plum Aralia, Balfour aralia	Greenish	July to September	2 to 6 m	Easy to grow

Planting and care

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun to Partial Shade	Well-drained soil or a regular potting mix	Medium to wet	15 degrees C/59 degrees F	Apply any organic fertilizer
