Dinner Plate Aralia Plant

Description for Dinner Plate Aralia

Plant height: 10 - 16 inches

Plant spread: 4 - 8 inches

A Balfour aralia is an evergreen plant. The distinct leaves of a Balfour Aralia resemble leathery, round, dinner plates about 1 to 2 inches in diameter, which is how the plant got its nickname, the Dinner Plate Aralia.

Common name(s): Shield Aralia, Plum Aralia, Balfour aralia

Flower colours: Greenish

Bloom time: July to September

Max reachable height: 2 to 6 m

Difficulty to grow: Easy to grow

Planting and care

Aralia plants can propagate by stem cuttings or if the stems are thick enough, air layering during the rainy season. Propagating aralia plants is more successful when temperatures are above 21 degrees C.

Sunlight: Full Sun to Partial Shade

Soil: Well-drained soil or a regular potting mix

Water: Medium

Temperature: 15 to 30 degrees C

Fertilizer: Apply any organic fertilizer

Caring for Dinner Plate Aralia

- Adequate watering is of course, essential, but over-watering is above all the greatest cause of the demise of virtually all Aralias.
- It is generally thought that plants will thrive when kept on the dry side.
- False aralia does not like to be moved. A sudden change in location causes the leaves to drop off.
- Trimming the tips of an Aralia Plant helps promote new growth.

Harvesting

NA
