

Million hearts plant, Dischidia ruscifolia (green) - Plant

Dischidia ruscifolia is an evergreen, perennial sprawling or climbing plant with small succulent heart-shaped leaves that face each other on a long arching stem creating chains of heart. The tiny white flowers grow in leaf axils (between a leaf and the stem) bloom throughout the year and remain for long periods of time.

With this purchase you will get:

01

Million hearts plant, Dischidia ruscifolia (green) Plant

01

4 inch Grower Round Plastic Pot (Black)

Description for Million hearts plant, Dischidia ruscifolia (green)

Plant height: 2 - 5 inches

Plant spread:

Taro may be started from a bulb (actually a corm) a cormel (the small corms that form as offsets of the parent corm), offshoots of the parent corm, or even the top inch of the parent corm with about the first 8 to 10 inches of the leaf petioles (stems).

Common name(s): Million Hearts, Million Hearts Vine

Flower colours: White

Bloom time: Throughout the year and remain for long periods of time

Max reachable height: 3 to 5 feet

Difficulty to grow: Easy to grow

Planting and care

Also, select a site that gets full sun. For dependable blooms, plants need six to eight hours of direct sunlight a day. If it's too shady, the stems will attempt to lean towards the sun or get spindly and fall over. Most of the popular varieties prefer acidic to neutral soil, but some are lime-tolerant or prefer alkaline soils.

Sunlight: Part shade

Soil: Well-drained soil

Water: Medium to wet

Temperature: 65 degrees F

Fertilizer: Apply any organic fertilizer

Caring for Million hearts plant

Do not prune plants in the fall. Simply cut off any dead or diseased canes. Stop fertilizing 6 weeks before the first frost but continue watering during dry autumn weather to help keep plants fortified during the dry winter. Mound, mulch, or add compost after a few frosts but before the ground freezes.

Typical uses of Million hearts plant

Special features: Under especially favorable circumstances, taro can reach 6 feet in height, with gigantic 24 inch heart shaped leaves. Their appearance immediately types them as tropical and they are very effective in pots and tubs and at waters edge with other tropical foliage.

Ornamental use: The plant is used for ornamental purpose.
