Description

Description for Dracaena Mahatma, Cordyline Terminalis Mahatma

Generally, Cordyline fruticosa plants exhibit upright growth in shrub form with their unbranched trunk. But sometimes they grow in clumps by suckering from the enlarged tuber-like rhizomes.

Common name	Flower colours	Bloom time	Height	Difficulty
lectric Pink Dracaena ... Pink Dracaena, Pink Cordyline, Dracaena Palm, Cordyline Plant, Giant Dracaena	-	Seasonal bloomer	9.00 to 15.00 feet	easy to grow

Planting and care

cordyline is good grown in US zones 10 to 12. This plant does not like 55 degrees and below in temperatures. This plant likes partial shade to almost full sun. When in full-sun the plant should be watered more often. If this plant is being grown indoors, put it in a bright spot but no sunlight that is direct.

Sunlight	Soil	Water	Temperature	Fertilizer
Part shade to full shade	well-drained soil	Medium	55 degrees	Apply for organic fertilizer

Caring for Dracaena Mahatma

If this plant is being grown indoors, put it in a bright spot but no sunlight that is direct. Allow the soil to dry out in between watering. Keep air humid (especially indoors) though so mist every so often.

Typical uses of Dracaena Mahatma

Special features: special feature is cordyline â€œFestival Burgundy.

Ornamental use: Houseplant for bright, humid areas.

Medicinal use: Cordyline fruticosa spent most of its history with humans as a food, a source of alcohol, or a medicine. Now its foliage is in demand. Use Ti leaves to wrap foods to be grilled, steamed or baked.
