Description

Description for Dwarf Beans Purple Queen

The bean is a bushy, hardy annual that can grow from 3 to 4½ feet tall. The bean has square stems with leaves divided into leaflets. Pods are 6 to 8 inches long and contain 4 to 6 flat, oval seeds that can be white, yellow, green, or pinkish-red. Different types of varieties are available to grow in different habitat like ... Pencil Beans Selection

Common name	Flower colours	Bloom time	Height	Difficulty
Vicia faba, horsebean, broadbean, fava bean	-	February-August.	0.5â€1.8 m	Easy to grow

Planting and care

Beans are a cool-season crop that grow best in temperatures ranging from 60° to 65°F, but fava beans will grow in temperatures as low as 40°F and as warm as 75°F. Sow broad beans in spring as soon as the soil can be worked for harvest before the weather warms

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun	well-drained soil	Provide regular water throughout the growing season.	60° to 65°F	Apply any organic fertilizer

Caring for Dwarf Beans Purple Queen

- Water broad beans just before the soil dries out, but do not over-water them.
- Keep soil moist during flowering and pod formation.
- Plant beans in well-drained soil.
- Broad beans do not require feeding apart from planting in fertile,

Harvesting

Beans require 80 to 100 days to reach harvest. Pick broad beans for fresh use like snap beans when seeds are about the size of a pea.
