Description

Description for Eagle Wood

Easily grown in average, medium, well-drained soil in full sun to part shade. Wide range of soil tolerance as long as drainage is good. Prefers rich, moist soils in light to moderate shade. Freely self-seeds and will naturalize to form large colonies in optimum growing conditions. Remove flowering stems after bloom to encourage additional bloom. Keep soils uniformly moist after bloom to prolong attractive foliage appearance. When foliage depreciates, plants may be cut to the ground.

Common name	Flower colours	Bloom time	Height	Difficulty
Aloeswood, Agarwood, oud, oodh	Green, White.	April to May	2 to 3 feet	Easy to grow

Planting and care

The incidence Cumulative Trauma Disorders (CTDs) in nursing homes is a growing problem. Constant interaction between patients and employees and the absence of proper equipment result in many preventable sprains and strains.

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun to Partial Shade	Well-drained soil	Medium	280 to 300 degrees C	Apply any organic fertilizer

Caring for Eagle Wood

Eaglewood Care Center, like many other elderly care facilities in the state, faced high employee injury and turnover rates due to everyday, work related tasks. These tasks include lifting residents, repositioning them and assisting with their many other daily activities.

Typical uses of Eagle Wood

Special features: Borders, cottage gardens, open shade gardens, woodland gardens or naturalized areas. Also a good selection for a hummingbird garden. Continue to water plants after bloom to enjoy the ground cover effect of the attractive foliage.

Culinary use: Wood, Extracted oil

Ornamental use: The plant is used for ornamental purpose.

Medicinal use: To treat unhealed wounds, Leprosy, Skin diseases, used as s anti-venom, to treat eye and ear problems.
