Echeveria Black Prince Plant

01

3 inch Grower Round Plastic Pot (Black)

## Description for Echeveria Black Prince

**Plant height:** 3 - 6 inches

**Plant spread:** 3 - 5 inches

Striking succulent forms dark, nearly black rosettes. Salmon-red flowers in autumn and winter attract hummingbirds.

Dramatic foliage adds wonderful contrast to succulent plantings and rock gardens. Well-suited to containers, both indoors and out. Evergreen.

**Common name(s):** Black prince

**Flower colours:** Red

**Bloom time:** Fall and Winter

**Max reachable height:** Up to 30.5 cm

**Difficulty to grow:** Easy to grow

## Planting and care

The deep planting encourages the developing stem to send out roots to help stabilize the plant and perhaps eliminate the need for stacking. Also, deep planting keeps lily bulbs cool when temperatures soar. Grow this tender succulent under cover, or as a garden perennial in mild dry climates. It is splendid in containers and large-scale rock gardens.

**Sunlight:** Partial to full sun

**Soil:** Well-drained sandy soil

**Water:** Once established, needs only occasional water.

**Temperature:** 12 degrees C

**Fertilizer:** Apply any organic fertilizer

## Caring for Echeveria Black Prince

- Remove deadhead to prolong flowering.
- Maintain moderate soil moisture and fertilize lightly.
- The most important part of good Echeveria care is watering. The biggest issue with the succulents is overwatering. Provide moderate amounts of water in the hot, dry season.
- Let the soil dry out completely before you irrigate again. Potted plants should not be left in a wet saucer.
- Soft rots and root rot issues occur when the plant is too wet.

## Typical uses of Echeveria Black Prince

**Special features:** Growing plants is believed sacred in India and other Asian countries as it is believed that proper positioning Lotus plants brings prosperity, peace and serenity to the house.

**Culinary use:** NA

**Ornamental use:** The plant is used for an ornamental purpose.

**Medicinal use:** NA
