Description

## Description for Erigeron canadensis

Erigeron canadensis is an annual plant native throughout most of North America and Central America. It is also widely naturalized in Eurasia and Australia.

Common name	Flower colours	Bloom time	Height	Difficulty
Conyza canadensis, horseweed, Canadian horseweed, Canadian fleabane, coltstail, marestail, and butterweed.,Erigeron canadensis	white	Jul , Aug , Sep , Oct , Nov	1.5 m (60 in) tall	easy to grow

## Planting and care

Growing plants can be inexpensive, particularly when growing them from seed. Seeds of plants flowers should usually be sown directly into the sunny flower bed, as developing roots do not like to be disturbed.

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun	well-drained soil	Medium	25C	Apply any organic fertilizer

## Caring for Erigeron canadensis

Place plants in full sun in average, well-drained soil. Drainage is important; don t place where roots will sit in water. Leaves develop best flavor in full sun.

## Typical uses of Erigeron canadensis

**Special features:** It is also widely naturalized in Eurasia and Australia. Common names include horseweed, Canadian horseweed, Canadian fleabane, coltstail, marestail and butterweed.
