Description Erigeron canadensis is an annual plant native throughout most of North America and Central America. It is also widely naturalized in Eurasia and Australia.

Common name: Conyza canadensis

Color: white

Bloom time: Jul , Aug , Sep , Oct , Nov

Height: ½ to 7

Difficulty level: easy to grow

Planting & Care

Growing plants can be inexpensive, particularly when growing them from seed. Seeds of plants flowers should usually be sown directly into the sunny flower bed, as developing roots do not like to be disturbed.

Sunlight: Full Sun

Soil: well-drained soil

Water: Medium

Temperature: 25°C

Fertilizer: Apply any organic fertilizer

Care:

- Place plants in full sun in average, well-drained soil.
- Drainage is important; don't place where roots will sit in water.
- Leaves develop best flavor in full sun.
-

Special Feature:

It is also widely naturalized in Eurasia and Australia. Common names include horseweed, Canadian horseweed, Canadian fleabane, coltstail,

marestail and butterweed.
