Description

### Description for Eucharis, Amazon Lily

Amazon Lily grow in rock crevices in savannas that have distinct dry and wet seasons; others grow in high plateau regions that have cool weather for most of the year.

Common name	Flower colours	Bloom time	Height	Difficulty
Hippeastrum	White	Late December until the end of June.	24 in/60 cm.	Easy to grow

### Planting and care

Amazon lily can be planted from February through May and will bloom in the winter. Amazon lily plant needs partial shade. Amazon lily bulb should be planted with the tip on the surface of the soil. Amazon lily's corm is planted 4 inches deep. Keep the soil moist, allowing the surface to dry to the touch between waterings.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun	Well-drained soil.	Keep soil moist throughout the growing season.	20°C	Apply any organic fertilizer.

## Caring for Eucharis

- Amazon lilies demand more water. Water them often from spring through summer and early fall. The intensity of watering can be reduced in winter months.
- Re-pot Amazon lilies every 3-4 years.
- Place Amazon lily plant in a bright window, but never in direct sunlight.
- Fertilize the plants regularly.

## Harvesting

January to June.
