Description Veratrum viride, known as Indian poke, Indian hellebore, false hellebore, green false hellebore or giant false-helleborine, is a species of Veratrum native to eastern and western North America.

**Common name:** Veratrum viride

**Color:** yellow.

**Bloom time:** Spring Season

**Height:** 90 cm

**Difficulty level:** easy to grow

**Planting & Care**

When growing Veratrum species such as White and False hellebore it is probably easiest to purchase them from a garden centre or from a divided plant; plant out following the last frost of spring.
