Description

Description for False Hellebore

Veratrum viride, known as Indian poke, Indian hellebore, false hellebore, green false hellebore or giant false-helleborine, is a species of Veratrum native to eastern and western North America.

Common name	Flower colours	Bloom time	Height	Difficulty
Veratrum viride, Indian poke, Indian hellebore, false hellebore, green false hellebore or giant false-helleborine	yellow to green	Spring Season	90 cm	easy to grow

Planting and care

When growing Veratrum species such as White and False hellebore it is probably easiest to purchase them from a garden centre or from a divided plant; plant out following the last frost of spring.
