Description

Description for Football Lily

Scadoxus multiflorus is the scientific name of football lily. This perennial grows from a rhizomatous bulb. It has a false stem as leaves are wrapped together. Leaves may appear after flowering or with them. A false stem can grow up to 60 cm. Up to 100 individual flowers are produced in an umbel inflorescence.

Common name	Flower colours	Bloom time	Height	Difficulty
Football lily, blood lily, ball lily, blood flower, Katherine-wheel, oxtongue lily, poison root and powderpuff lily	Pink and red shades	Summer to early autumn	Up to 18 inches	Easy to grow

Planting and care

It can be planted in containers or in the ground and indoor or outdoor. Propagation is possible by seed. Plant the bulbs in spring with equal parts of loam or sandy soil and manure. Keep spacing of up to 10 inches. Re-pot occasionally in spring or early summer.
