Description

Description for Gainera

Narrow Petal Frangipani is a cultivated hybrid derived from a cross between *Plumeria stenophylla* and an unknown parent. The tree grows mostly up to around 1.5-2 m tall and is deciduous, therefore losing its leaves during long, dry periods.

Common name	Flower colours	Bloom time	Height	Difficulty
Narrow Petal Frangipani, Narrow Petal Plumeria	white	September or October.	5m	easy to grow

Planting and care

An accurate soil test will tell you where your pH currently stands. Acidic (sour) soil is counteracted by applying finely ground limestone, and alkaline (sweet) soil is treated with ground sulfur. If you order roses from a mail-order company, order early, in January or February (March at the latest). They are usually shipped in the spring as bare roots when plants are fully dormant, well before they have leafed out

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun to Partial Shade	well-drained soil	Medium	55F	Apply any organic fertilizer

Caring for Gainera

- Start with pruning shears for smaller growth. Use loppers, which look like giant, long-handle shears, for growth that is more than half an inch thick.

- A small pruning saw is handy, as it cuts on both the push and the pull.

Typical uses of Gainera

Special features: Gainers, in turn, bought Swift Canadian in early 1981 but Gainers never became one of the big three, as it began to sell off or close the meat-packing plants

Ornamental use: The plant is used for ornamental purpose.

Medicinal use: We used Monte Carlo methods to simulate a treat-totarget strategy,
