Description

## Description for Gardenia, Ananta

Place in light to moderate shade, preferably with minimum competition from tree roots. Gardenias resent root disturbance. Use fertilizer for acid loving plants, and use iron compounds.

Common name	Flower colours	Bloom time	Height	Difficulty
Ixora, Jungle geranium	Wide range	May to June	2.00 to 3.00 feet	Moderately easy

## Planting and care

The soil, which should be loose and organic, should be kept moist, but take care not to over water.

Monitor the soil frequently for moisture, and water thoroughly as the top inch of soil dries.

The gardenia plant should also receive cooler nighttime temperatures and warmer daytime temperatures.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun, Partial sun	Loamy soil, Sandy soil,	Medium	30 to 40 degrees C	Apply any organic fertilizer

## Caring for Gardenia

- As for outdoor gardenia care, you should keep in mind that when the gardenia plant is grown outdoors, it generally prefers to be kept in partial shade.
- Gardenias also prefer moist, but well-drained acidic soil with plenty of organic matter.

## Typical uses of Gardenia

**Special features:** In the St. Louis region, gardenias are grown as pot or larger container plants.

**Ornamental use:** The plant is used for ornamental purpose.
