Description

Description for Gardenia Dwarf, Ananta Dwarf

There are over 200 Gardenia varieties available in a wide range of height, flower size and color, leaf size and color, blooming time and duration and shrub habit.

Common name	Flower colours	Bloom time	Height	Difficulty
-	Wide range	May to June	2.00 to 3.00 feet	Moderately easy

Planting and care

The soil, which should be loose and organic, should be kept moist, but take care not to over water.

Monitor the soil frequently for moisture, and water thoroughly as the top inch of soil dries.

The gardenia plant should also receive cooler nighttime temperatures and warmer daytime temperatures.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun, Partial sun	Well-drained soil	Keep soil moist throughout the growing season	20 to 30 degrees C	Apply any organic fertilizer

Caring for Gardenia Dwarf

- As for outdoor gardenia care, you should keep in mind that when the gardenia plant is grown outdoors, it generally prefers to be kept in partial shade.
- Gardenias also prefer moist, but well-drained acidic soil with plenty of organic matter.

Typical uses of Gardenia Dwarf
