Description

Description for Gazania (Yellow-Orange)

Care of Gazania flowers is limited and often non-existent if you have neither the time nor the inclination to care for them. Botanically called *Gazania rigens*, treasure flowers is a more common name. The plant is often referred to as the African daisy

Common name	Flower colours	Bloom time	Height	Difficulty
African daisy	Yellow-Orange	Summer through Fall	6 to 18 inches	easy to grow

Planting and care

Get the cuttings started in 4-inch pots, in a good quality potting soil. Plant rooted cuttings in spring at 24 to 30 inches apart. Keep watered until plants are established, then water every two weeks throughout summer. Overhead irrigation is acceptable when watering Gazanias.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun	well-drained soil	Medium	15 C and above	Apply any organic fertilizer

Caring for Gazania

- Gazania plants are easy to grow. They do well in hot, dry weather. They even tolerate salt!!
- Grow plants in full sun.
- Gazania prefers good to average, sandy soil. The soil needs to be well drained.
- Established plants do best in dry soil conditions. Water plants only during long, extended droughts.
- Fertilize plants every 4-5 weeks, with a general purpose fertilizer.
- Bring indoors in the fall, before the first frost, and grow gazania as a houseplant.

Typical uses of Gazania

Special features: Mass in beds and borders. Containers. With its trailing stems, this species is particularly useful in hanging baskets.

Ornamental use: The plant is used for ornamental purpose. Its generally keep indoor in living room and in terrace area.
