Part shade

Soil
Well-drained soil

Water
Medium

Temperature
68-82 F.

Fertilizer
Apply any organic fertilizer

Caring for Grape Ivy

- As mentioned above, when caring for grape ivy, a low light exposure is most advantageous, although grape ivy can tolerate bright to moderate light if kept sufficiently moist.
- Allow soil of grape ivy to dry slightly between waterings, taking care not to over irrigate.
- Soil considerations when growing grape ivy is important as the root systems require excellent aeration.
- A potting mixture of peat combined with particles such as bark, perlite, Styrofoam and calcined clay, is the best medium in how to care for grape ivy houseplants.

Typical uses of Grape Ivy

Special features: Hanging baskets, containers or as a vine on a room-dividing trellis.

Ornamental use: The plant is used for ornamental purpose.
