## Planting and care

Grape ivy (*Cissus rhombifolia*) is not really an ivy, but a tropical plant. The plant is part of the grape family of plants and is considered a vine. Grape ivy originates from Central and South America but grows as a houseplant in cooler climates.

The plant does well outdoors in U.S. Department of Agriculture plant hardiness zones 10 through 12. Grape ivy is a climbing plant but maintains a compact growth habit when you prune it in spring. Other names of this plant include oak leaf ivy and Venezuela tree vine.

**Sunlight:** Part shade

**Soil:** Well-drained soil

**Water:** Medium

**Temperature:** 68-82 F.

**Fertilizer:** Apply any organic fertilizer

## Caring for Grape Ivy

- As mentioned above, when caring for grape ivy, a low light exposure is most advantageous, although grape ivy can tolerate bright to moderate light if kept sufficiently moist.
- Allow soil of grape ivy to dry slightly between waterings, taking care not to over irrigate.
- Soil considerations when growing grape ivy is important as the root systems require excellent aeration.
- A potting mixture of peat combined with particles such as bark, perlite, Styrofoam and calcined clay, is the best medium in how to care for grape ivy houseplants.

## Typical uses of Grape Ivy

**Special features:** Hanging baskets, containers or as a vine on a room-dividing trellis.

**Ornamental use:** The plant is used for ornamental purpose.
