Description Leaves typically yellow in alkaline soils. Tolerates a broad range of soil conditions, but will not tolerate flooding or soils saturated with moisture. Avoid poorly drained soils. Best growth in the wild usually occurs in rich bottomlands and swamp margins.

Common name: Ilex opaca Steward s Silver Crown

Color: white

Bloom time: May to June

Height: 15.00 to 25.00 feet

Difficulty level: easy to grow

Planting & Care

Have a hose or bucket of water and all your planting tools nearby. Keep your bare-root rose in water until you are ready to place it in the ground. Plants can be cut back and moved in either spring or fall, but not in midsummer, as they might suffer and die in the heat.

Sunlight: Full sun to part shade

Soil: well-drained soil

Water: Medium

Temperature: 36 °C

Fertilizer: Apply any organic fertilizer

Care:

- Plant care may require a bit of effort, but the results are well worth the work.
- Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance.
- Common is a vine and has larger glossy green leaves than Royal.
- Both can survive in temperate climates if they are planted in a sheltered area.
- Arabian is a small bush with evergreen leaves.

-

Care:

- Epsom salts along with your fertilizer; the magnesium sulfate will encourage new growth from the bottom of the bush Prune plants every spring and destroy all old or diseased plant material.
- Wear elbow-length gloves that are thick enough to protect your hands from thorns or a clumsy slip, but flexible enough to allow you to hold your tools.
-

Special Feature:

Specimen or group. Foundation planting. Foliage provides excellent color for the winter landscape, and cuttings of the same are popular additions to Christmas wreaths and decorations. Berries are attractive and a good winter food source for birds. Hedges. Woodland gardens. Use

Medicinal use:

- Herbs-Treat and Taste is about herbs and spices and their uses in medicine and cookery.
