Description Grindelia camporum is a species of flowering plant in the daisy family known by the common names Great Valley gumplant and Great Valley gumweed.

Common name: Blue Daze, Brazilian dwarf morning-glory, Hawaiian Blue Eyes

Color: Yellowish-green

Bloom time: April

Height: 50.00 to 70.00 feet

Difficulty level: easy to grow

Planting & Care

Mexican Snowball is a succulent plant which is popular as a potted ornamental plant. It features rosettes of unusual blue-green foliage, which are often densely clustered and may form a small mound. The leaves may have a powdery coating and may develop red tints at the tips and edges. Small, red-yellow flowers are carried on short stems, and appear from late spring.

Sunlight: Full sun

Soil: well-drained soil

Water: Medium to wet

Temperature: 68°F

Fertilizer: Apply any organic fertilizer

Care:

- Small, red-yellow flowers are carried on short stems, and appear from late spring.
- This is a small, easy to grow attractive plant suitable for small spaces.
- It takes over whatever small space you leave for it and blooms once a year.
- Hen and Chicks is native to Latin America.

Special Feature:

A medium shade tree for lawns, streets or parks.

Use

Ornamental use:

- The plant is used for ornamental purpose.

Note:

Chlorosis (yellowing of leaves) is common in alkaline soils and can severely damage this tree. Pin oak is otherwise infrequently attacked by the common diseases of oaks which include oak wilt, chestnut blight, shoestring root rot, anthracnose, oak leaf blister, cankers, leaf spots and powdery mildew.
