Description

Fairies Washboard Haworthia is a robust plant, with larger rosettes - which grow to about 5 inches across, with broadly triangular leaves arranged in a pinwheel-like rosette.

Common name: Haworthia keithii, Haworthia marlothiana

Color: white

Bloom time: summer

Height: 40 cm

Difficulty level: easy to grow

Planting & Care

An accurate soil test will tell you where your pH currently stands. Acidic (sour) soil is counteracted by applying finely ground limestone, and

alkaline (sweet) soil is treated with ground sulfur. If you order roses from a mail-order company, order early, in January or February (March at the latest). They are usually shipped in the spring as bare roots when plants are fully dormant, well before they have leafed out

Sunlight: Full Sun

Soil: Full Sun

Water: Medium

Temperature: 24-26°C

Fertilizer: Apply any organic fertilizer

Care:

- Start with pruning shears for smaller growth.
- Use loppers, which look like giant, long-handle shears, for growth that is more than half an inch thick.
- A small pruning saw is handy, as it cuts on both the push and the pull.
-

Special Feature:

Flowers are small, white and bell-shaped on long stems. The species and its varieties have a rather wide distribution - they are native to Mozambique, Swaziland, and South Africa, with a number of recognized varieties and regional forms.

Use

Culinary use:

- leaves

Ornamental use:

- The plant is used for ornamental purpose

Note:

no serious & insects disease problems.
