**Common name:** Indian Elm, entire-leaved elm tree, jungle cork tree, south Indian elm tree

**Color:** Pale yellow

**Bloom time:** Seasonal bloomer

**Height:** 30.00 to 60.00 feet

**Difficulty level:** easy to grow

Planting & Care

Have a hose or bucket of water and all your planting tools nearby. Keep your bare-root rose in water until you are ready to place it in the ground. Plants can be cut back and moved in either spring or fall, but not in midsummer, as they might suffer and die in the heat.

**Sunlight:** Full sun

**Soil:** well-drained soil

**Water:** Medium

**Temperature:** 25°C

**Fertilizer:** Apply any organic fertilizer

**Care:**

- Plant care may require a bit of effort, but the results are well worth the work.
- Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance.
- Common is a vine and has larger glossy green leaves than Royal.
- Both can survive in temperate climates if they are planted in a sheltered area.
- Arabian is a small bush with evergreen leaves.
- 

**Care:**

- Epsom salts along with your fertilizer; the magnesium sulfate will encourage new growth from the bottom of the bush Prune plants every spring and destroy all old or diseased plant material.
- Wear elbow-length gloves that are thick enough to protect your hands from thorns or a clumsy slip, but flexible enough to allow you to hold your tools.
- 

**Special Feature:**

Shade tree for landscapes. In native habitats, practical uses include (1) wood is used for a variety of purposes including posts, crates, construction, and carpentry, (2) foliage is a fodder source for livestock, (3) medicinal applications for treatment of a wide variety of medical impairments and (4) seeds are edible.

Use

**Medicinal use:**

- The plant *Holoptelea integrifolia* is used traditionally for the treatment of inflammation, gastritis, dyspepsia, colic, intestinal worms, vomiting, wound healing, leprosy, diabetes, hemorrhoids, dysmenorrhea, and rheumatism [5].

**Note:**

for medicinal use
