Description

Description for Iceland Poppy Nudicale Mixed

It is used extensively in the southeast, since a fall seeding will create a lavish spring display, but the plants are unable to live through the hot summer that follows.

Common name	Flower colours	Bloom time	Height	Difficulty
Papaver nudicaule	pink, yellow, orange, rose, white, cream and stunning bicolors.	May- July,spring	2 feet in height.	Medium

Planting and care

In warm climates plant Iceland poppies in the fall for bloom the following spring. When the summer heat arrives they will die-out. In cooler climates they can be sown in spring and will bloom the first year - and will live for a couple of seasons flowering in spring and early summer.

Sunlight	Soil	Water	Temperature	Fertilizer
Full Sun to Partial Shade.	Well-drained soil	Keep soil moist throughout the growing season.	65Å° F	Apply any organic fertilizer

Caring for Iceland Poppy Nudicale Mixed

- Iceland poppy care includes a onetime feeding in spring. Other Iceland poppy care involves the deadheading of spent blooms for more of the cup-shaped flowers to appear.
- You should also water infrequently during times of limited rainfall.
- Now that youâ€™ve learned how to grow an Iceland poppy, be sure to plant some seeds in fall when youâ€™re planting spring bulbs into a sunny area. Plant them in masses for showy blooms.

- The Iceland poppy flower is a great companion to other spring blooming plants.

Typical uses of Iceland Poppy Nudicale Mixed

Special features: These large, silky, showy poppies are superb for cutting.

Ornamental use: The plant is used for ornamental purpose for example decorations.
