Kalanchoe (light Pink) Plant

01

5 inch Grower Round Plastic Pot (Black)

Description for Kalanchoe (light Pink)

Plant height: 5 - 9 inches

Plant spread: 5 - 9 inches

Kalanchoe is pretty, low-maintenance, perennial, succulent plant that blooms bunches of small blossoms on branching bracts. They are typically grown indoor condition but can be placed outside whenever temperatures are warm enough or if winter temperatures don't get low enough to harm them.

Common name(s): Basket of Gold

Flower colours: Light Pink

Bloom time: Winter season

Max reachable height: Up to 5 feet

Difficulty to grow: Easy to grow

Planting and care

null

Sunlight: Partial sunlight

Soil: Coarse Soil

Water: Moderately

Temperature: 25 to 40 degrees C.

Fertilizer: Feed bi-weekly in the summer with a liquid fertilizer, or use slow-release pellets.

Caring for Kalanchoe

While usually grown as a house plant, the succulent perennials of the Kalanchoe family can grow outside in regions with warm or mild winters. The more light, the denser the foliage and the more numerous the blooms.

Typical uses of Kalanchoe

Special features: Flowering

Ornamental use: The plant is used outdoor and indoor living room.
