Kamrak, Starfruit Plant

Description for Kamrak, Starfruit

Plant height: 24 - 38 inches

Plant spread: 4 - 6 inches

Interesting Fact: Shape of this fruit resembles a star especially cross-section of the cut fruit looks like a 5-pointed star.

Starfruit is a small to medium sized juicy tropical exotic fruit. This fruit has oxalic acid in it and because of this, it is acidic in nature. Starfruits are sweet or sour fruit. Usually, this fruit shape is like a star with a ribbed structure. The yellow fruit is 3-4 inch long with waxy skin and 5 prominent ridges.

Common name(s): Foreign peach, carambola, five corners, star fruit, kamrakh and kamranga

Flower colours: Pink

Bloom time: Winter

Max reachable height: Up to 2 feet

Difficulty to grow: Easy to grow

Planting and care

Starfruit is propagated from the grafting, budding, and layering as well as from the seeds. Planting distance of the starfruit plants is 8 meter x 8 meter.

Sunlight: Full Sun to Partial Shade

Soil: Sandy loam soil

Water: Moderately

Temperature: 25 to 35 degrees C

Fertilizer: Apply any organic fertilizer.

Caring for Kamrak

- Water a plant when the soil feels dry to touch. Water thoroughly in the summer and reduce watering for the winter & rainy season.
- Try to water the plants in the morning around 8-10am.
- You should remove dead, infected or damaged plant parts and throw in the garbage collector.
- You should prune and fertilize a plant mostly in the spring season.
- When a plant grows beyond its limit and pot size not providing enough space for the spread of roots, re-pot with fresh soil and some fertilizer.
- While re-potting, try not to disturb the roots. Avoid any drastic change in the provided environment otherwise, the plants may get stress/shock.
- For any insect attack or disease, you can use Neem oil, Eucalyptus oil or Citrus oil spray for primary treatment.

Typical uses of Kamrak

Special features: Fruit shape

Culinary use: Sweet fruits can be eaten fresh and sour fruits can be used for making pickling or a substitute for tamarind.

Ornamental use: This plant grows in the garden.

Medicinal use: Starfruit is a good source of vitamin-A, vitamin-C, and B-complex.
