Description

Description for Kusum Tree, Ceylon Oak

Hibiscus rosa-sinensis, known colloquially as Chinese hibiscus, China rose, Hawaiian hibiscus, and shoeblackplant, is a species of tropical hibiscus, a flowering plant in the Hibisceae tribe of the family Malvaceae, native to East Asia.

Common name Hibiscus rosa-sinensis	Flower colours Yellow	Bloom time Seasonal bloomer	Height 4 to 10 feet	Difficulty Easy to grow
---------------------------------------	--------------------------	--------------------------------	------------------------	----------------------------

Planting and care

For dependable blooms, lilies need six to eight hours of direct sunlight a day. If it's too shady, the stems will attempt to lean towards the sun or get spindly and fall over. Most of the popular varieties prefer acidic to neutral soil, but some are lime-tolerant or prefer alkaline soils (e.g., Madonna lilies).

Sunlight Full sun to part shade	Soil Well-drained soil	Water Medium	Temperature 5 to 35 degrees C	Fertilizer Apply any organic fertilizer
------------------------------------	---------------------------	-----------------	----------------------------------	--

Caring for Kusum Tree

In active growth, water freely especially if rainfall is less than 1 inch per week. Keep lilies mulched so that their roots are cool. The mulch should feel moist but not wet. Apply a high-potassium liquid fertilizer every 2 weeks from early spring until 6 weeks after flowering. Keep moist in winter.

Kusum oil is a type of oil extracted from the seed of the Kusum tree (*Schleichera oleosa*). The plant, which is also commonly known as ceylon oak, lac tree, or Macassar oiltree, belongs to the Sapindaceae family. The schleichera family is named after J. C. Schleicher, a Swiss botanist, and the species name means "oily" or "rich in oil." The tree is native to India and Pakistan, but is also found in some parts of Southeast Asia.

Typical uses of Kusum Tree

Special features: In USDA Zones 10-11, plants are excellent as specimens, hedges or screens. In areas where not winter hardy, plants are excellent in containers that may be brought indoors in fall or grown as houseplants.

Ornamental use: The plant is used for ornamental purpose. Its generally kept indoor in living room and in terrac area.

Medicinal use: The leaves of the *Hibiscus rosa-sinensis* are used as a laxative. The flowers of this plant may be used if you become infected with a type of *E. Coli* causes diarrhea. The *Hibiscus rosa-sinensis* has anti-diarrhea properties. The flowers are also used for fertility treatments.
