Planting & Care

In Vietnam the plant's young leaves are consumed as vegetables, and its old leaves and mature fruit are used in traditional medicine for reducing glucose in blood.

Sunlight: Full Sun to Partial Shade

Soil: well-drained soil

Water: Medium

Temperature: 25-28 deg.C

Fertilizer: Apply any organic fertilizer

Care:

- It is a small to medium-sized tree growing to 20 metres (66 ft) tall, with smooth, flaky bark.
- The leaves are deciduous, oval to elliptic, 8–15 cm (3.

- 1–5.
- 9 in) long and 3–7 cm (1.
- 2–2.
- 8 in) broad, with an acute apex.
-

Care:

- Deadhead to prolong flowering.
- Maintain moderate soil moisture and fertilize lightly.
- plant will die with the first frost.

Special Feature:

The leaves of the banabá and other parts are used widely in the Philippines, Taiwan, and Japan as a tea preparation. Banabá herb is one of the 69 herbal plants promoted by the Philippine Department of Health (DOH).[3] In Vietnam the plant s young leaves are consumed as vegetables, and its old leaves and mature fruit are used in traditional medicine for reducing glucose in blood.

Use

Note:

Luckily, plants are deer-resistant, so they might help keep nearby flowers from being eaten.
