Description

Description for Lagerstroemia Speciosa, Pride of India, Taman

Lagerstroemia speciosa is a species of Lagerstroemia native to tropical southern Asia.

Common name Lagerstroemia Speciosa, Banaba, Pride of India, Queen Cape Myrtle, crape myrtle, Queen s crape myrtle.	Flower colours Creamy red	Bloom time July to September	Height 5.00 to 20.00 feet	Difficulty easy to grow
---	------------------------------	---------------------------------	------------------------------	----------------------------

Planting and care

plant care may require a bit of effort, but the results are well worth the work. Not all plants are fragrant, but the most common and hardy do produce a sweet, carrying fragrance. Common is a vine and has larger glossy green leaves than Royal. Both can survive in temperate climates if they are planted in a sheltered area.

Sunlight Full sun	Soil well-drained soil	Water Medium	Temperature 25-28 deg.C	Fertilizer Apply any organic fertilizer
----------------------	---------------------------	-----------------	----------------------------	--

Caring for Lagerstroemia Speciosa

- Every leaf has a growth bud, so removing old flower blossoms encourages the plant to make more flowers instead of using the energy to make seeds.
- Clean away from around the base of the rosebushes any trimmed debris that can harbor disease and insects.

Typical uses of Lagerstroemia Speciosa

Special features: Good as a specimen shrub or in groups. Shrub borders or perennial borders. In the South where above ground winter hardiness is not a problem. plants can also be effectively planted as screens, informal hedges or trained as single trunk trees for use both in the landscape or as a street tree.

Ornamental use: The plant is used for ornamental purpose.
