Description Laurus nobilis is an aromatic evergreen tree or large shrub with green, glossy leaves, native to the Mediterranean region. It is one of the plants used for bay leaf seasoning in cooking. Wikipedia

Common name: Laurus nobilis is an aromatic evergreen tree or large shrub with green, glossy leaves, native to the Mediterranean region. It is one of the plants used for bay leaf seasoning in cooking. Wikipedia bay laurel

Color: greenish yellow

Bloom time: March to May

Height: 10.00 to 30.00 feet

Difficulty level: easy to grow

Planting & Care

Laurus nobilis growing plant of the genus Laurus also known as Bay laurel or Bay tree, Laurus nobilis perennial evergreen plant, grow as shrub? or tree and also used as ornamental plant grow in mediterranean, desert, subtropical, temperate, tropic climate

Sunlight: Full Sun to Partial Shade

Soil: well-drained soil

Water: Medium

Temperature: -5°C (23°F)

Fertilizer: Apply any organic fertilizer

Care:

- Raise the container off the ground with bricks or attached pot feet to improve drainage conditions.
- If necessary, place a drainage tray beneath the container.
- Water the bay tree moderately, stopping when water trickles from the drainage holes in the container.

- Let the soil dry completely before watering again because overwatering can result in root rot and spotted or yellowed leaves.
- If roots do become waterlogged, replace the soil and compost completely and cut back on water.

Special Feature:

Outdoors, it makes an interesting specimen for shady areas of the landscape including patios, herb gardens and woodland gardens. May be grown as a screen. Excellent houseplant.

Use

Medicinal use:

- It is widely recognized for its medicinal and culinary characteristics

Ornamental use:

- The plant is used for ornamental purpose.
-
