Description

Description for Madhuca Indica, Moh

A deciduous tree, 10-15m tall and with a spreading, dense, round, shady canopy. Bark is rough, brown in color, slightly cracked and fissured, inner bark red, exudes white, milky sap when cut.

Common name	Flower colours	Bloom time	Height	Difficulty
Madhuka, Ippe, Yappa, Mahuda, Mahua, Mohwa, Mauwa, Hippe, Ponnam, Ilupa, Mahwa, Mohwra, Mahula, Moha, Madgi, Illupei, elupa, Mahwa, Maul, Mahula, Butter tree	White	Seasonal bloomer	6.00 to 15.00 feet	easy to grow

Planting and care

It is cultivated in warm and humid regions for its oleaginous seeds, flowers and wood. The tree grows on a wide variety of soils but thrives best on sandy soil. The species is drought-resistant, strong light demander and readily suppressed under shade. It is not frost-hardy. It also grows on shallow, bouldery, clayey and calcareous soils.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun to part shade	well-drained soil	Medium	2-46 deg C	Apply any organic fertilizer

Caring for Madhuca Indica

The tree grows on a wide variety of soils but prefers sandy soil. It also performs in alluvial soil.

Typical uses of Madhuca Indica

Special features: Interesting house plant, the leaflets of which can be snipped for cooking.

Ornamental use: The plant is used for ornamental purpose.
