Madhumalti Dwarf, Rangoon Creeper Plant

Description for Madhumalti Dwarf, Rangoon Creeper

Plant height: 5 - 9 inches

Plant spread: 4 - 6 inches

Tender plants are reddish in color. As they grow, the normal green color appears. In a mature creeper, the stem becomes woody and thorns appear. Once established, it hardly dies.

Clusters of fragrant white pendulous trumpets open white then change to pink, red and finally a deep maroon. This plant needs support for growing and is very useful in covering fences, supports, and walls.

Under good growing conditions, it is typically seen with lush and fresh green foliage or cascading branches with numerous axillary and terminal drooping racemose inflorescence that is simply spectacular.

Common name(s): Rangoon Creeper, Burma creeper, Chinese honeysuckle, Madhu Malati

Flower colours: Clusters of fragrant white pendulous trumpets open white then change to pink, red and finally a deep maroon.

Bloom time: February to May and August to November
