Description

Description for Mango Totapuri, Aam Totapuri (Grafted)

It has the considerable shelf life of a week after it is ripe making it exportable. It is also one of the most expensive kinds of mango and is grown mainly in western India. Mango is the leading fruit crop of India and considered to be the king of fruits.

The tropical fruit is called the "King of Fruits" in India. The tree has been around for more than 4000 years in India and was taken to South America by the Portuguese, other parts of South Asia by Indians and to other tropical regions by others.

A mango tree needs an ideal climate to grow. It is a tropical fruit and needs a lot of sun to grow and bear fruit.

Common name	Flower colours	Bloom time	Height	Difficulty
Mango Totapuri, Aam	Whitish green	Spring, Summer	Up to 10 to 80 ft	Easy to grow

Planting and care

Planting is usually done in the month of July-August in rainfed areas and during February-March in irrigated areas. Planting spacing should be 10 X 10 m. Dig pits of 1 m x 1 m x 1 m. Fill in with topsoil mixed with 10 kg of FYM.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sunlight	Loamy, alluvial, well-drained, aerated and deep soils rich in organic matter with a pH range of 5.5 to 7.5	Medium	20 to 35 degree C	Applied any organic fertilizer or manure.

Caring for Mango Totapuri

- Choose the sunniest spot in your garden and dig a 12-inch deep hole.
- If the plant is slightly bigger, then dig a slightly deeper hole.
- Also, prepare the soil with fertilizers and plant feed before planting the tree.
- Plant the tree deep and then pack the soil.
- However, make sure that the soil is loosely packed to enhance water absorption.
- Control the weed.

Harvesting

Spring, Summer
