Description

Description for Marginata (Dracaena marginata)

Dracaena Marginata, is a popular indoor plant originally from East Africa that is often used to adorn homes and offices. These are some of the best house plants and make great additions to any home while requiring minimal care. Bright indirect light is best and they will take some morning sun. Most Dracaena will tolerate lower light levels for some time with reduced watering frequency.

Common name	Flower colours	Bloom time	Height	Difficulty
Dracaena marginata, Red-edge Dracaena or Madagascar dragon tree, Dracaena deremensis.	White	Summer flowering	6 to 10 feet	Easy to grow.

Planting and care

The best way to grow dracaenas is to buy a small one from us and plant it in a simple pot. After that, the necessary care is very simple. Plants that are dark green usually require less light than those that have any kind of colour in their leaves. The less light a plant has, the slower it grows. The slower it grows the less water and fertilizer it needs.

Sunlight	Soil	Water	Temperature	Fertilizer
Most of those in the Dracaena genus including the Corn Plant do best in	Loose, well-drained potting mix.	In lower to medium light, water dracaena marginata when the potting soil has	28 to 38 degrees C	Fertilize lightly at the beginning of spring or twice a year with controlled-

light shade or gentle filtered
sunlight.

dried almost to the bottom.

release fertilizer.

Caring for Marginata

- D. marginata is sensitive to fluoride, which can cause discolouration.
- Water with distilled or non-fluoridated water.

Typical uses of Marginata

Special features: Container or above-ground planter; border; suitable for growing indoors; accent

Ornamental use: Used as indoor plant in home and offices.
