01

5 inch Grower Round Plastic Pot (Black)

Description for Money plant variegated, Scindapsus goldking

Plant height: 0.5 - 1.0 inches

Plant spread: 4 - 8 inches

Epipremnum aureum is the scientific name of this plant. *Scindapsus aureus* (Synonym) is an indoor climbing, hanging, or trailing plant.

It is a striking plant with fleshy, gold-splashed, green foliage which is typically heart-shaped, but often oval. There are plain green leaved varieties from which this particular variegated plant was parented. They rarely flower when grown as indoor plants.

Common name(s): Devil's vine, hunter's robe, money plant, silver vine, devil's ivy, pothos, ivy arum, money plant, taro vine, Solomon Islands ivy

Flower colours: Greenish-colored spathe

Bloom time: Bloom in early to mid-summer

Max reachable height: Up to 20 m

Difficulty to grow: Very easy to grow

Planting and care

You can plant it anytime and in any season with great ease. You just have to cut a stem from a parent plant and plant it where ever you want. You can plant it anywhere whether in soil or in water. You can plant it in your garden as well as in your house. The best part about this plant is that you can plant it just by cutting a part of already grown money plant.

Just cut the stem of already grown money plant and plant it in soil. Cut the fresh stem from the growth tip. If you are planting it in soil then make a hole in the soil and plant it. If you are planting it as indoor plant in a glass jar or bottle and you want to plant it in water then fill the bottle more than half and plant it.

Sunlight: Partial sunlight

Soil: Well-drained soil

Water: If you plant it in water then change the water of jar or bottle every 2-3 days. If you plant it in soil then do not water excessively. During summer water every alternate day and during winter after 4-5 days. Give time to soil to dry, then water.

Temperature: Prefers warmer temperatures of between 15 degrees C and 30 degrees c. Lower leaves will turn yellow or produce rust like spots if temperatures fall below 10 degrees c to 12 degrees c.

Fertilizer: It needs common fertilizer. To plant in soil, use fertile soil. Use nitrate base fertilizer. If you are using liquid form then dilute it with water and then mix them in soil. Never add fertilizers just after trimming. Always add fertilizers in shade or in evening. Never add them in sunlight, as it can burn leaves.

Caring for Money plant variegated

- If you plant it in a pot then ensure that pot should have proper drainage system otherwise roots of money plants will be damaged by excessive water.

- Wooden or plastic pole warp with husk is suitable for climbing the plant up and foster faster growth.
- Tie the stems as it grows up, till it reaches the top progressively.
- You can also use coir ropes to wrap around plastic or glass poles which will give enough support for the plant to grow up.
- Trim by cutting away dead or overgrown branches or stems of the money plant.

Harvesting

NA

Typical uses of Money plant variegated

Special features: Foliage

Culinary use: NA

Ornamental use: You can grow this as an indoor or outdoor plant. Keep a stem of money plant in a bottle of water and decorate indoor or outdoor.

Medicinal use: Able to clear formaldehyde from the air, it is a beneficial plant to have in your living room or as a hanging plant, as the leaves will grow down in cascading vines.
