Description

Description for Moulmein rosewood

Leaves are pinnate and leaflets oval in shape. The tree may be confused with the Pongam Tree as the flowers appear the same. Looking just at the buds, one might confuse it with Mexican Lilac, however, Moulminein Rosewood has more drooping clusters like Amaltas.

Common name	Flower colours	Bloom time	Height	Difficulty
Tuma,Botanical (Bengali),	Pea shaped, pinkish purple, clustered with red bracts, blooms hanging downwards	Flowering time March to April	More than 5 meters	Easy to grow

Sunlight	Soil	Water	Temperature	Fertilizer
Sun growing, Semi shade	-	Keep soil moist throughout the growing season. or Water plant once in a week	-	-

Caring for Moulmein rosewood

- Plant the tree in an open spot with sandy soil and full sun. Keep the soil moist deep down by soaking it with a hose for half an hour, but letting it dry out in between watering.
- Care for a Moulmein rosewood tree almost always includes pruning. In order to give it the best shape to show off those blooms, smaller branches should be trimmed early in the spring.

Typical uses of Moulmein rosewood

Special features:

Ornamental use: Moulmein Rosewood is a small deciduous tree, planted mostly for ornamental purposes
