Murraya Paniculata, Calcutta Kamini Plant

Description for Murraya Paniculata, Calcutta Kamini

Plant height: 16 - 24 inches

Plant spread: 3 - 5 inches

Murraya paniculata is cultured as an ornamental tree or hedge because of its hardiness, wide range of soil tolerance and is suitable for larger hedges. The plant flowers throughout the years and produces small, fragrant flower clusters which attract bees, while the fruits attract small frugivorous birds.

Common name(s): Orange Jessamine, kunti

Flower colours: White

Bloom time: Seasonal bloomer

Max reachable height: 8 to 12 feet

Difficulty to grow: Easy to grow

Planting and care

Murraya paniculata, commonly known as orange jessamine, satinwood or orange jasmine, is a flowering shrub with twisting branches, dark green, glossy leaves and fragrant blossoms. Orange jessamine commonly grows to 12 feet in height and equally wide, but in some cases may take the shape of a tree and grow to be as tall as 20 feet.

Sunlight: Full sun to part shade

Soil: Well-drained soil

Water: Medium

Temperature: 20 to 22 degrees C

Fertilizer: Apply any organic fertilizer

Caring for Murraya Paniculata

- Tropical evergreen plant native to southern China, Taiwan, the Indian sub-continent (i.e. India, Nepal, northeastern Pakistan, and Sri Lanka) and also Australia.
- This plant produces small, white, scented flowers and is grown as an ornamental tree or hedge.
- Closely related to citrus, Murraya bears orange to red fruits that resemble kumquats, however, some cultivars do not set fruit.

Typical uses of Murraya Paniculata

Special features: Where winter hardy, orange jessamine is often grown as a hedge or screen. Interesting in containers or planters. For areas north of USDA Zone 10, plants must be overwintered indoors.

Ornamental use: The plant is used for ornamental purpose. Its generally keep indoor in living room and in terrac area.
