Description

Description for Muscari, Grape Hyacinth (White)

They should not be confused with hyacinths. They usually have one or more narrow leaves which arise from a bulb. The flowers appear in the spring and form a spike or raceme, being held in a close or loose spiral around a central stalk.

They usually have one or more narrow leaves which arise from a bulb. The flowers often become less tightly spaced as the flower matures. Individual flowers are composed of six fused tepals forming a spherical to obovoid shape.

Common name	Flower colours	Bloom time	Height	Difficulty
Grape hyacinth	White	Spring	Up to 10 inches	Easy to grow

Planting and care

Space the bulbs approximately three inches apart, planting about 20 bulbs per square foot. Plant them three to five inches deep.

Sunlight	Soil	Water	Temperature	Fertilizer
Sun or light shade	Well-drained sandy soil	Low to Moderate	4 to 23 degrees C	No need for fertilizer. They require little feeding or watering in the summer.

Caring for Muscari

- Remove any weeds, competitive roots and stones from the area.
- Once their leaves die off, you can cut them back.

Harvesting

NA
