## Planting and care

Tecoma capensis, commonly known as cape honeysuckle, is a flowering, versatile evergreen that is suitable as a climbing vine, border plant, shrub or ground cover. It blooms in clusters of tubular, red-orange flowers that are about 2 inches in length in the late summer, fall and winter.

Sunlight	Soil	Water	Temperature	Fertilizer
Full sun	well-drained soil	Medium	20 C to 30C	Apply any organic fertilizer

## Caring for Mussaenda

- Train a climbing vine cape honeysuckle plant on a trellis or other supporting object using plant ties to support the vines.
- To maintain the shape of shrubs, prune long or unruly branches back to a side branch or bud with sharp pruning shears.
- Cut off old, damaged or dead branches at their base and remove them.

## Typical uses of Mussaenda

**Special features:** Popular plants in southern Florida and California where they are often planted as specimens, massed in gardens and shrub borders or planted as informal hedges or screens.

**Ornamental use:** The plant is used for ornamental purpose. Its generally kep indoor in living room and in terrac area.
